

FIND RICH VALUES IN MOORE'S CREEK

Seven miles to the northeast of Round Mountain on the same slope of the Toiyabe range, is a small gold camp which, for some unknown reason, has been almost entirely overlooked.

And yet it is four years since C. W. Anderson, a rancher, found gold on the surface while riding after cattle. Free gold which is carried in the most beautiful looking quartz and pans as readily as the gold of Round Mountain.

The district is known at the present time as Moore's Creek, and, curious to relate, there are five leasers now hard at work in this unknown camp sacking high grade ore.

A representative of the Nugget made the trip to Moore's Creek last Sunday on horseback and spent the day going over the ground. It would be difficult to imagine a more promising showing than the surface formation and indications present.

Four leasers, William Trembath, J. L. Sullivan, C. M. Dull and Pat Murphy, are working on the Baby claim owned by Mr. Anderson. They have sunk two shafts, one of them sixty feet deep and the other fifty feet. At the bottom of each shaft the men have drifted between fifty and seventy-five feet on the vein.

The ledge averages about three feet in width and a more perfectly defined one it would be difficult to find anywhere. It is practically all quartz, with a tale seam on the hanging wall. The quartz carries the rich ores in stratas. Assays which have been taken across the entire two feet of ledge give an average return of \$40 to the ton in gold and silver, with the former predominating.

This ledge can be traced and followed for over four thousand feet along the surface and everywhere it is exposed by removing the surface soil it shows as clearly defined as though cut with a knife.

Panning after panning was made from rock picked out of the drifts and in the surface open cuts along the ledge and, without a single exception, they all showed free gold. One panning made from a handful of rock taken from an open cut, not more than ten feet from the surface, went about seven cents to the small

egg pan. A sample of this rock was brought back to Round Mountain by the Nugget representative and given to Assayer W. H. Berg. It assayed \$906.60 in gold and \$70.91 in silver to the ton. These leasers already have about two tons of this high grade sacked and a dump full of the ore which they state will mill in the neighborhood of \$40 per ton.

A short distance above the leasers is a shaft known as the Gold Hole, worked by Mr. Anderson, in which high grade streaks were found running from \$48 up into the thousands. Specimens of this picture ore which were exhibited by Mr. Anderson, showed the free gold riddling the quartz. No work is being done here at present, as a deal is in progress of consummation whereby a syndicate figures on securing a lease on the block.

Joseph Frenzel is another leaser who is down about twenty feet and has been getting good pannings all the way from the surface.

This then is the sum total of development work done in a district deserving of thorough prospecting and exploration. Only since the first of the year has any notice been taken of it even by those living as nearby as Round Mountain and then it gradually dawned on a handful that here was a promising prospect at their very doors.

Silently they have stolen away one by one and staked a claim or two and at the present time there is a small camp made up of the leasers and those who are doing their location work.

Assays made from the rock taken from the location holes all give good prospect returns, mostly in gold, but with sufficient silver to indicate permanent values and already there are plans on foot which indicate that the days of Moore's Creek's obscurity are at an end.

The location is an ideal one for a camp, with running water and plenty of timber near at hand. The altitude is a little higher than Round Mountain and a more beautiful view of the Big Smoky Valley and the Toiyabe mountains is not to be had.

Quartz and porphyry predominate in the formation of the country and the granite hills with which the Round Mountain district is backed have entirely changed. It is no longer granite, but what it is still remains to be decided, for opinions at the present time are at variance.—Round Mountain Nugget.

SPHINX MILL BEGINS GRINDING

The Sphinx mill is the fourth in Round Mountain to begin the work of grinding out the bullion. By the time this issue of the Nugget is in the hands of the majority of its readers the Sphinx will have become one of the steady sources of gold supply for the U. S. mint.

George E. Weber, a son of Superintendent J. L. Weber of the Sphinx mine, who has been in charge of the construction work, will have supervision of the work of milling.

Fires were started under the boiler on Thursday in order to warm them up and yesterday steam was turned on for the first time. Only one shift will be worked for the present until all the parts are perfectly adjusted and everything is working smoothly.

Owing to the heavy winds which have prevailed during the week, the work of putting up the high trestle over which the cars will be run from the ore dump to the mill had been somewhat delayed.

The Sphinx has already one of the largest ore dumps in the camp and this will be run at once. No decision had been reached in regard to the resumption of work in the mine at the time the Nugget representative called, but there is enough ore on the dump to keep the mill going for a considerable length of time without extracting any from the mine.

The mill is a six-foot Huntington, which has been found adaptable to the ores of the camp and it has a capacity of forty tons a day. The building has been constructed with a view to installing a second Huntington when it is required.

When asked as to the time when the mine would again resume work, Superintendent J. L. Weber said: "I have nothing to do with the matter and it will rest entirely with Mr. Clark. Mr. Clark is now in Goldfield and I expect him to arrive in camp any day. It is possible that when he comes he will have some instructions for me."

The Sphinx mine is one of the numerous properties in the district for which is predicted great things in the line of production and dividends.—Round Mountain Nugget.

LOOK AROUND YOUR OFFICE

For ledgers, daybooks, in fact for anything that may be lacking in your office, go to the Bonanza bindery. We have samples of the style of work which is turned out, but for the matter of that one does not have to visit the bindery. There are samples of our work in nearly all the offices in the city.

Our work stands as the best recommendation of the character of the stuff that we turn out. We can do anything in our line that can be done in any of the big cities, can do it as well, and give better service in the matter of prompt delivery than any other institution of the kind in the State.

In connection with the regular show, at the matinee today and tomorrow at the Butler theater, a film of the English warships reviewed by King Edward; also an 1100-foot film of the Atlantic squadron as reviewed by President Roosevelt, will be shown. Among the notables appearing in this film is William Jennings Bryan.

ORE SHIPMENTS.

Following is the statement of ore shipments from April 1st to 7th, inclusive:

From—	Tons.
Tonopah Min. Co.	3745
Tonopah Belmont Dev. Co.	863
Tonopah Midway Min. Co.	196
Tonopah Ex. Min. Co.	108

Round Mountain Antelope Leasing Co.

Owens the Bartlett-Travers Lease on the Famous Antelope Claim at Round Mountain. The Lease Has Two Years to Run

THIS IS A SECOND GOLDFIELD MOHAWK

Two Ledges Have Been Encountered on the Property and a Shaft is Down 65 Feet

We are offering 50,000 shares only of the Treasury Stock of this company at 12½ cents per share to raise money with which to continue the development work.

The sensational strike made on the Paulsen-Blaisdell ground adjoins this lease. The strike was made ONLY THIRTY FEET FROM OUR SIDE-LINE, and according to surveys and the trend of the ledge it WILL TRAVERSE OUR GROUND FOR A DISTANCE OF 300 FEET. This ledge, 2½ feet wide, is phenomenally rich and eight inches of it contains specimen or picture ore that will run into the thousands of dollars to the ton, the balance averaging about \$200 to the ton. There is a custom mill within a mile of the property that will treat our ore for \$8 per ton, thus insuring a big profit. The officers and directors of the company are men of the highest standing in Nevada: Henry J. Bartlett, owner of the Round Mountain Nugget and heavily interested in different Round Mountain properties; James W. Travers, a pioneer of the district and also heavily interested in many properties there, and Mr. Gibbons, a well-known Tonopah attorney, while Messrs. Hertel and Price are men prominent in the mining industry of the state.
